

Meadowbrook Elementary School Northbrook, Illinois

“I am very pleased to recommend Quartz Concepts tile. Our installation at the Northbrook Meadowbrook Elementary School has combined an excellent design with vivid Quartz Concepts tile colors. Our students, teachers, and parents are thrilled by the new design of our two multi-purpose rooms. We look forward to a long relationship with Knight Quartz Flooring.”

Russell S. Jensen, Director of Building and Grounds,
Northbrook School District 28.

Situation

The school of more than 500 elementary students was in need of an affordable solution to upgrade the design and performance of their gymnasium and multi-purpose room. In the past, VCT had been used and found to be unacceptable due to shrinkage, breakage, and difficulty keeping VCT clean.

Solution

Architects chose Quartz Concepts as the solution to Meadowbrook's flooring problem. The tile was chosen because of the following performance features:

- Dimensional stability – of primary importance when installing custom cut designs.
- Vivid color selection created the visual impact desired by the school administration.
- 3000 psi supports rigorous student activity.
- Low cost alternative to traditional gymnasium wood floors.
